Intercontinental Terminal Company Fire in Deer Park, Texas

Daily Situation Report (SITREP) #5

Reporting Period: March 18, 2019 - March 27, 2019 (9am)

Current Situation:

- Intercontinental Terminal Company chemical storage tanks caught fire the evening of Sunday, March 18, 2019. The chemicals released in the fire include Naphtha, Xylene, Toluene, and Benzene. The fire continued to burn until Wednesday, March 20, 2019.
- Based on air monitoring reports from TCEQ taken today, local officials report readings remain below action levels. No serious injuries have been reported from the incident. Continuous air monitoring by TCEQ and EPA are being done.
- On Friday March 22, 2019 at approximately 12:15PM the dike wall at ITC Deer Park containing the product released during the recent fire event partially collapsed. As a result, ITC sent out a Shelter-In-Place notification to industrial neighbors and the San Jacinto Texas State Historic Site. At this time, the City of Deer Park is not ordering this within the city limits and will update as available.
- Poison Centers collected data from calls in which information was requested regarding the chemicals involved; a person was reporting being exposed to the toxic fumes, or health care professionals requesting recommendations regarding treatment symptoms.
- The most common reported symptoms as of 3/25/19 were headache, nausea, throat irritation, cough, dizziness and or vertigo, chest pain, and ocular irritation.
- The TPCN received a total of 230 calls from 3/17/19 to 3/27/19 as of 9am. Of these calls, 172 calls were exposures and 58 were requests for information calls.
- Texas Department of State Health Services is warning people not to eat fish caught in the Houston Ship Channel. The entire area has been closed since Friday (3/22/19), and the U.S. Coast Guard has been skimming the water to pull out oily product.

Table 1	Exposure	Information	Total
Calls per day			
03/17/2019	1	0	1
03/18/2019	4	4	8
03/19/2019	6	5	11

**Missing = 21			

* The number in the parenthesis () corresponds to the code in Toxicall

** Number missing calls from category

Table 2 below displays the total number of information case records received, grouped by the type of information call.

Table 2: Type of Total Information Calls	
Type	Frequency
Drug Information (251)	2
Environmental Information (253)	37
Medical Information (254)	10
Poison Informtaion (256)	5
Other Information (259)	4

Table 3 displays information about the different substances reported on each case record. Each case can have multiple substances reported. The table displays the substances called about by day and total times substance was reported on an Exposure or Information case record. The uptick in case records related to Benzene and Smoke occur on Mar 21 after the shelter in place was issued.

Table 3													
	Admin Info	Benzene	Carbon Monoxide	Ethylene Dichloride	General / Unknown	Hydro - Carbon	Indoor Air Quality	Naptha	Poison Info	Smoke	Toluene	Xylene	Total
